

# RECUMBENT BIKES

Recumbent Bike with Adjustable Seat

True Step-through Design

Recumbent Bike with Fixed Tall Back Seat

Adjustable Cranks Optional

## ISO1000R and ISO7000R RECUMBENT BIKES

SCIFIT recumbent bikes are designed for cardiovascular conditioning and strength training via the Iso-Strength program. Iso-Strength, coupled with bi-directional resistance (ISO7000R) allows the user to perform a leg press movement (forward), and gluteus and hamstring exercise (reverse) on the recumbent bike. This versatile recumbent is perfect for all users and is ideal for hospitals, physical therapy, rehabilitation and chiropractors.

- The ISO1000R and ISO7000R features a true adjustable step-through design. The step-through space adjusts up to a full 23 inches. With only a 3 inch step over height, this bike provides safe, easy access for all ages and fitness levels.
- The optional cranks provide three adjustments (5", 6" & 7"). These adjustable pedal cranks give the user the versatility to adjust their range of motion.

Order Code	Model	Bi-Directional	Seat
ISO1010R	ISO1000R	No	Fixed Tall
ISO1011R	ISO1000R	No	Adjustable
ISO7010R	ISO7000R	Yes	Fixed Tall
